

CLIENT-READY TRAVEL RECORD

Stop reconstructing a year of travel from memory.

Jetseen helps a client maintain a chronological trip history, calculate rule-specific day totals, and export the dates used for professional review.

14-DAY TRIAL

\$119.99

one-time Lifetime Access

WHAT THE RECORD CONTAINS

1

A trip-by-trip chronology

Country, local arrival and departure dates, duration, purpose, notes, passport details, and correction context.

2

Rule-specific calculations

The calculation window, days counted, threshold remaining, and rule used for the selected jurisdiction.

3

A reviewable export

A CSV or report that can be retained with a filing, application, advice file, or evidence checklist.

4

A record the client owns

Core travel data and calculations remain local-first. Optional GPS assistance is off by default.

WHAT "AUDIT-READY" MEANS

A coherent date record that shows the trips, calculation period, corrections, notes, and evidence available for review.

It does not mean that an app determines tax residence or immigration status. Homes, family, work, treaties, permits, exceptions, and travel purpose can change the legal answer.

ILLUSTRATIVE EXPORT

Country	Arrival	Departure	Days	Purpose	State
Portugal	2026-01-08	2026-02-11	35	Temporary stay	Confirmed
United Kingdom	2026-02-11	2026-02-18	8	Client meetings	Confirmed
United Arab Emirates	2026-02-18	2026-04-04	46	Primary residence	Confirmed

Ask the client to export when the advice or filing position is finalized. Retain that version with the workpapers and request a fresh export plus a correction note if a date later changes.
